RSU vesting for employees

LONDON and SALT LAKE CITY, August 3, 2023 (GLOBE NEWSWIRE) -- Renalytix plc (NASDAQ: RNLX) (LSE: RENX) announces that 92,770 Restricted Stock Units ("RSUs") previously granted to Company employees and consultants in accordance with the Renalytix plc 2020 Equity Incentive Plan have vested. Each RSU is convertible into two ordinary shares of £0.0025 each in the capital of the Company ("Ordinary Share") or into one American Depositary Share of the Company ("ADS"). Each RSU is to be delivered as an ADS to the relevant employees and consultants.

An application has been made to the London Stock Exchange for 185,540 new Ordinary Shares to be admitted to trading on AIM. It is expected that admission of the 185,540 new Ordinary Shares to trading on AIM will become effective on, or around, 8am UK time tomorrow 4 August 2023 ("Admission"). The new Ordinary Shares will rank pari passu with the existing Ordinary Shares of the Company.

Total voting rights

Following Admission, the Company will have 95,019,440 Ordinary Shares in issue with each share carrying the right to one vote. The Company has no Ordinary Shares held in treasury. The total number of voting rights in the Company following Admission will therefore be 95,019,440.

About Chronic Kidney Disease

Kidney disease is now recognized as a public health epidemic affecting over 850 million people globally. The Centers for Disease Control and Prevention (CDC) estimates that 15% of US adults, more than 38 million people, currently have chronic kidney disease (CKD). Diabetes is the leading cause of kidney failure, accounting for 44% of new cases. Further, the CDC

reports that 9 out of 10 adults with CKD do not know they have it and one out of two people with very low kidney function who are not on dialysis do not know they have CKD.¹ Kidney disease is referred to as a "silent killer" because it often has no symptoms and can go undetected until a very advanced stage. Each year, kidney disease kills more people than breast and prostate cancer. Every day, 13 patients in the United States die while waiting for a kidney transplant.

About Type 2 Diabetes

More than 37 million Americans have diabetes (about 1 in 10), and approximately 90-95% of them have type 2 diabetes. Type 2 diabetes most often develops in people over age 45, but more and more children, teens, and young adults are also developing the disease². Type 2 diabetes symptoms often develop over several years and approximately 23% of adults with type 2 diabetes are undiagnosed³. Type 2 diabetes affects many major organs, including the heart, blood vessels, nerves, eyes and kidneys. Diabetic kidney disease develops in 30-50% of type 2 diabetes patients⁴.

About Renalytix

Renalytix (NASDAQ: RNLX) (LSE: RENX) is an in-vitro diagnostics and laboratory services company that is the global founder and leader in the new field of bioprognosis™ for kidney health. The leadership team, with a combined 200+ years of healthcare and in-vitro diagnostic experience, has designed its KidneyIntelX laboratory developed test to enable risk assessment for rapid progressive decline in kidney function in adult patients with T2D and early CKD (stages 1-3). We believe that by understanding how disease will progress, patients and providers can take action early to improve outcomes and reduce overall health system costs.
