## Investor briefing – Seminar focused on AI-enabled diagnostics for kidney disease

March 12, 2019

Download [full announcement](#)

Renalytix AI plc (AIM: RENX), a developer of artificial intelligence-enabled diagnostics for kidney disease, announces that it will host investor briefings focused on AI-enabled diagnostics and kidney disease on Monday 25 March 2019.

A welcome and introduction will be given by James McCullough and Julian Baines, CEO and Chairman respectively. The seminars will also feature the below speakers:

- Steven Coca, MD – Co-founder RenalytixAI, Associate Professor, Medicine, Nephrology; Associate Chair for Clinical and Translational Research, Icahn School of Medicine at Mount Sinai
- Fergus Fleming, PhD – Chief Technical Officer RenalytixAI
- Rahul Patel – Executive Vice President Healthcare & Lifesciences, Persistent Systems
- Erik Lium, PhD – EVP Mount Sinai Innovation Partners, Assistant Vice Chancellor of Innovation, Technology & Alliances at UCSF

A morning seminar will welcome Institutional Investors with the afternoon seminar open to High Net Worth Individuals and Retail Investors. The same discussion topics and Q&A session will be available at each meeting.

Invitations will be sent out shortly, by the Company's brokers, for the morning seminar.

The afternoon seminar will take place at the Brand Exchange, 3 Birchin Lane, EC3V 9BW at 4.45pm for a 5.00pm start. This will be followed by light refreshments and a chance to network with all members of the Company's management team in attendance.

If you would like to register to attend the afternoon briefing or require further information, please contact Walbrook PR on 020 7933 8780 or email [renalytix@walbrookpr.com](mailto:renalytix@walbrookpr.com)

No new material information will be disclosed during the event.

### About Kidney Disease

Kidney disease is now recognized as a public health epidemic affecting over 850 million people globally. In the United States alone, over 40 million people are classified as having chronic kidney disease, with nearly 50 percent of individuals with advanced (Stage IV) disease unaware of the severity of their reduced kidney function. As a result, many patients progress to kidney failure in an unplanned manner, ending up having dialysis in the emergency room without ever seeing a clinical specialist, such as a nephrologist. Every day 13 patients die in the United States while waiting for a kidney transplant.

### About RenalytixAI

RenalytixAI is a developer of artificial intelligence-enabled clinical diagnostic solutions for kidney disease, one of the most common and costly chronic

medical conditions globally. The Company's solutions are being designed to make significant improvements in kidney disease diagnosis and prognosis, clinical care, patient stratification for drug clinical trials, and drug target discovery.
