

# RENALYTIX AI

30 September 2019

Renalytix AI plc  
("RenalytixAI" or the "Company")

## Update on non-executive director appointment

Renalytix AI plc (AIM: RENX), a developer of artificial intelligence enabled clinical diagnostics for kidney disease, announces that it expects to appoint an additional non-executive director and healthcare industry veteran within the coming weeks.

A qualified candidate has been identified to the Company and the process of completing regulatory due diligence is nearing completion. Further announcements will be made at the appropriate time.

### **About Kidney Disease**

Kidney disease is now recognised as a public health epidemic affecting over 850 million people globally. The Centers for Disease Control estimates there that 15% of United States adults or 37 million people currently have chronic kidney disease. It is reported that 9 out of 10 adults with CKD do not know they have it and 1 out of 2 people with very low kidney function who are not on dialysis do not know they have CKD\*. Kidney disease is referred to as a "silent killer" because it often has no symptoms and can go undetected until a very advanced stage. Each year kidney disease kills more people than breast and prostate cancer. Every day 13 patients die in the United States while waiting for a kidney transplant.
